Staff continues to work with the EnerGov Team on critical system issues. Work-arounds have been devised to allow the plan reviewers the ability to perform their reviews, although this is still a slow and inconsistent process. The issues creating these problems are a work in progress, but have yet to be resolved. The Community Development Team, IT and the Energov Assist Team continue to work through the long list of issues, and we are pushing the EnerGov team to provide a new plan of action and additional resources.
