

Plan Modification Form

Plan Modifications are used to submit revisions to your drawings after a Permit Card has been issued. Plan Modifications undergo the same plan review process as an initial construction drawings submittal. The fee for Plan Modifications is \$200.

Revision Submittal Instructions:

- Provide a written description of all changes in the scope of work.
- Resubmit the full set of construction drawings and cloud the plan modifications.
- Revise the cover sheet to show the date of revisions and any new pages.

Do not proceed with work until the Plan Modifications have been approved and the stamped drawings and updated Permit Card are on site.
