

# Information about the proposed Johnson Ferry Road at Glenridge Drive and Glenairy Drive Roundabout Alternative

## Driving Tips for a Roundabout

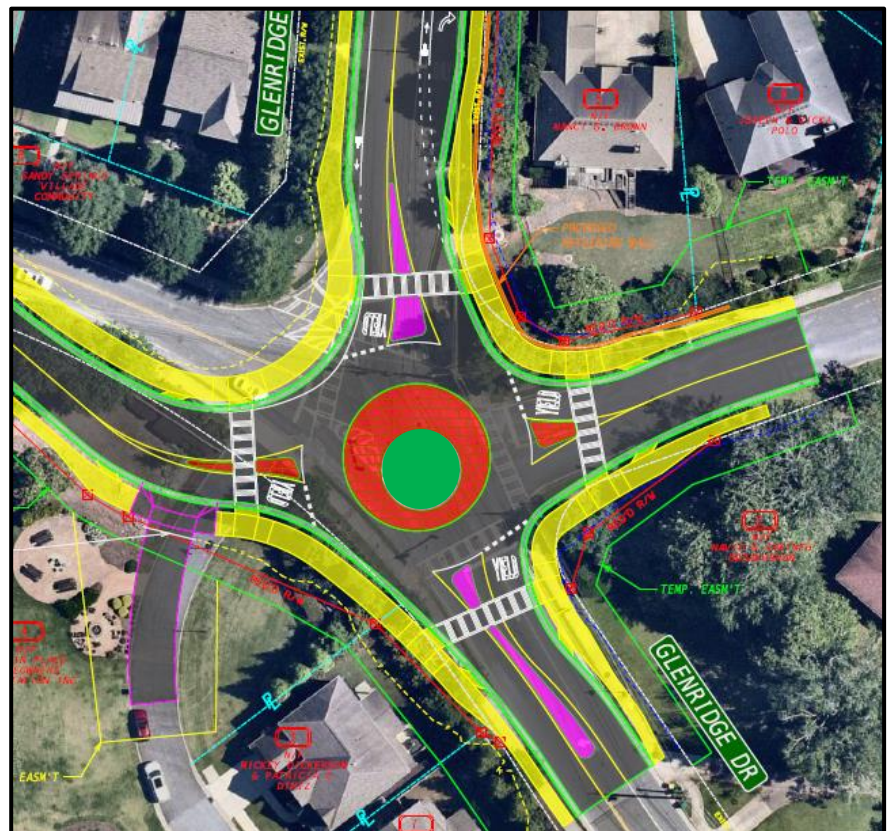

1. Yield to traffic circulating inside the roundabout – they have the right of way.
2. Drive counter-clockwise through the roundabout.
3. Keep moving while you are in the roundabout, and don't block emergency vehicles.
4. When exiting the roundabout, signal a right-turn just before you exit. This lets drivers waiting to enter the roundabout know that you're exiting.
5. Bicyclists may travel the roundabout in the same lane as a motor vehicle.

One of the alternatives the City of Sandy Springs is proposing is a roundabout on Johnson Ferry Road at Glenridge Drive and Glenairy Drive.

In a roundabout, tractor trailers, buses, and other large vehicles may utilize the truck apron to complete their maneuvers.

See the diagram to the right for a layout of the proposed roundabout alternative.
