Sandy Springs Police Headquarters and Municipal Court Complex

620 MORGAN FALLS ROAD

The new Sandy Springs Police Headquarters and Municipal Court Complex underscores the City's dedication to public safety and represents a substantial investment in modern facilities designed to better serve the community.

The site consists of 7.42 acres and includes an existing office building and associated at-grade parking. The original office building featured a brick veneer and storefront with structural steel frame of approximately 106,678 square feet. Built in 1990, it included one significant remodel. The City undertook a major renovation to the existing building and built an addition which expands the overall facility to better meet community needs.

Building - 130,542 ft²
Police HQ - 110,763 ft²
Courthouse/Lobby - 11,295 ft²
Sally Port - 8,484 ft²

FEATURES:

Courtroom - spacious enough to hold more than 100 visitors. The judges have private chambers located directly behind the dais.

Sally Port - a secure and controlled entryway to the facility, where defendants are escorted and await trial.

Sandy Springs Intelligence Operations Center (SSIOC) - The Criminal Intelligence Unit, based in the SSIOC, analyzes criminal group methods, crime patterns, and data from incident reports, field contacts, and arrests, while also providing real-time information to officers on priority calls through technologies like license plate readers and traffic cameras.

Judgemental Shooting - A specialized system that immerses officers in scenarios to enhance decision-making, focusing on de-escalation and the appropriate use of force, including deadly force.

Property and Evidence Room - a secure facility where evidence, seized property, and lost or recovered items are stored, cataloged, and managed. This room plays a critical role in preserving the integrity of evidence for investigations and court proceedings.

Crime Scene Investigation (CSI) Lab - forensic workspace equipped with specialized tools for analyzing evidence, processing crime scenes, and supporting criminal investigations.

Smart-room technology - intelligent meeting room booking capabilities, privacy glass, and more.

Open Air Atrium - a central courtyard for visitors and staff to enjoy the outdoors in between events or appointments.

SUSTAINABILITY FEATURES:

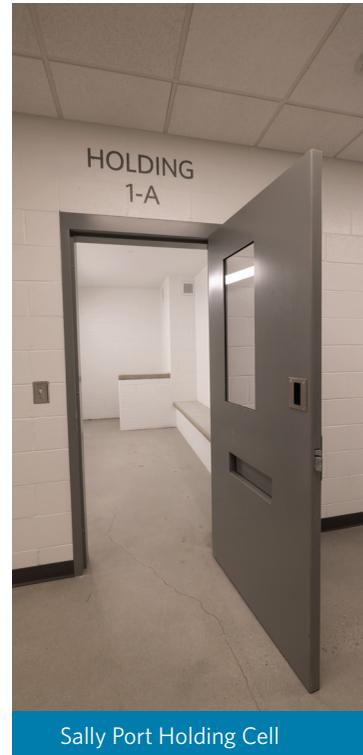

LED lighting system

Electric vehicle chargers

Cool White TPO Roof - a naturally reflective surface which reflects UV rays and heat from the building, saving money during the summer months by decreasing energy usage to cool the interior.
