## What is the Transportation Master Plan?

The Transportation Master Plan (TMP) identifies transportation needs in the City and develops a program of projects and strategies that are intended to improve the safety and operations of the transportation system. This TMP is a five-year update to the previous plan, which was adopted in 2021. The TMP is focused on projects that can be implemented in the next 10 years.

## What goals will the TMP achieve?

**Efficiency and Optimization**
Minimizing travel times and delay

**Improving Well-Being and Minimizing Environmental Impact**
Providing transportation options that promote wellness, preserve nature, and reduce emissions

**Safety**
Reducing the number of crashes that result in serious injuries and fatalities

**Mobility and Accessibility for All**
Providing travel options for all people, including children, seniors, and people with disabilities

**Maintenance, Resilience, and Reliability**
Making sure that roads, sidewalks, transit stops, and bicycle lanes are clean and well maintained

**Land Use Integration**
Making sure the transportation system fits with the area it serves and that major new destinations are planned with easy access in mind

**Economic Vitality**
Improving access to jobs and other economic opportunities

**Beautification**
Providing aesthetic enhancements as an element of transportation projects

## What does the plan schedule look like?

We are here

| Fall 2025 | Winter 2025/2026 | Spring 2026 | Summer 2026 |

**Plan Development**

**Community Engagement** — 1 ... 2 3

**Project List Development** — 4

**PUBLIC ENGAGEMENT**
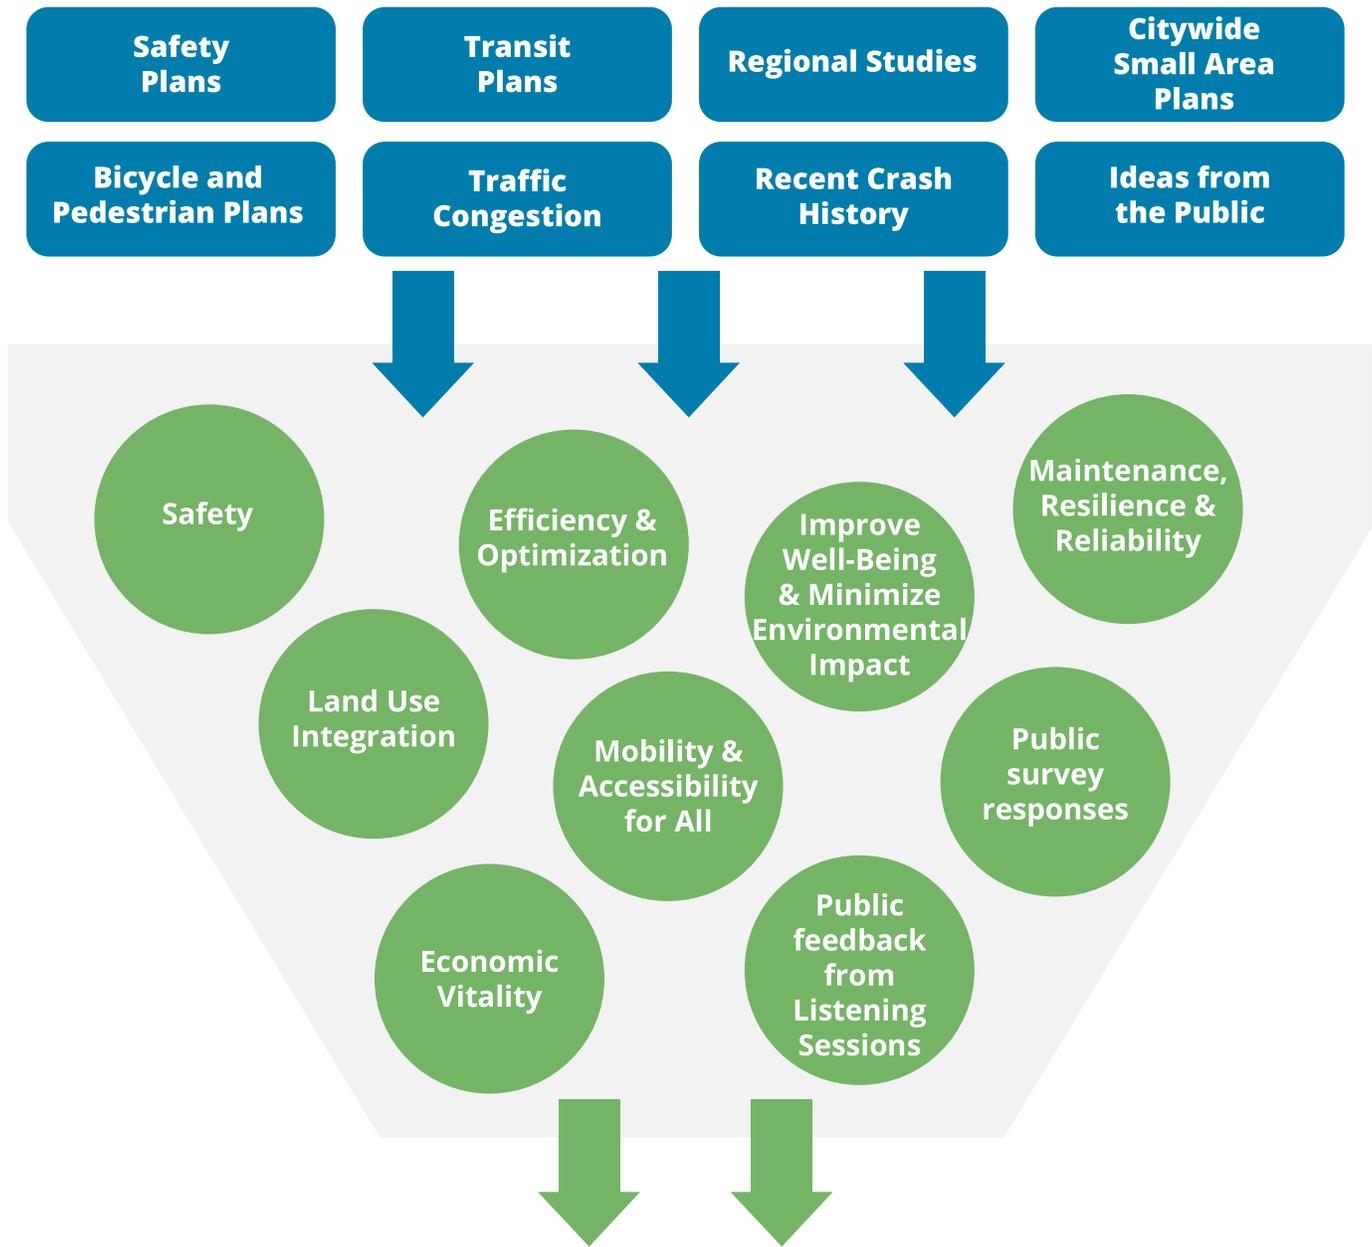

1 Pop-Up at Sandy Springs Farmers Market November 15, 2025

2 City Council Presentation #1 February 6, 2026

3 In-Person Listening Sessions February 24-26, 2026

4 City Council Presentation #2 Spring 2026

# How is the Transportation Master Plan being created?

The TMP is a collection of transportation project recommendations from previously adopted local plans, studies, and data. To determine priority transportation projects, these recommendations are compiled and filtered based on the metrics in the graphic below.

| Safety Plans | Transit Plans | Regional Studies | Citywide Small Area Plans |
|---|---|---|---|
| **Bicycle and Pedestrian Plans** | **Traffic Congestion** | **Recent Crash History** | **Ideas from the Public** |

- Safety
- Efficiency & Optimization
- Improve Well-Being & Minimize Environmental Impact
- Maintenance, Resilience & Reliability
- Land Use Integration
- Mobility & Accessibility for All
- Public survey responses
- Economic Vitality
- Public feedback from Listening Sessions

**Draft TMP Project List categorized into the following project types:**
- Bicycle-Pedestrian Improvements
- Intersection Improvements
- Access Management Improvements
- Operational Improvements
- Street Improvements
- Bridge Improvements*
- Signage, Marking, or Lighting Enhancements
- Transit Improvements
- Mid-Block Crossing Improvements
- Intelligent Transportation Systems*
- Non-Location Specific Projects*

Maintenance and resurfacing projects are not considered in this evaluation process and will be evaluated separately.
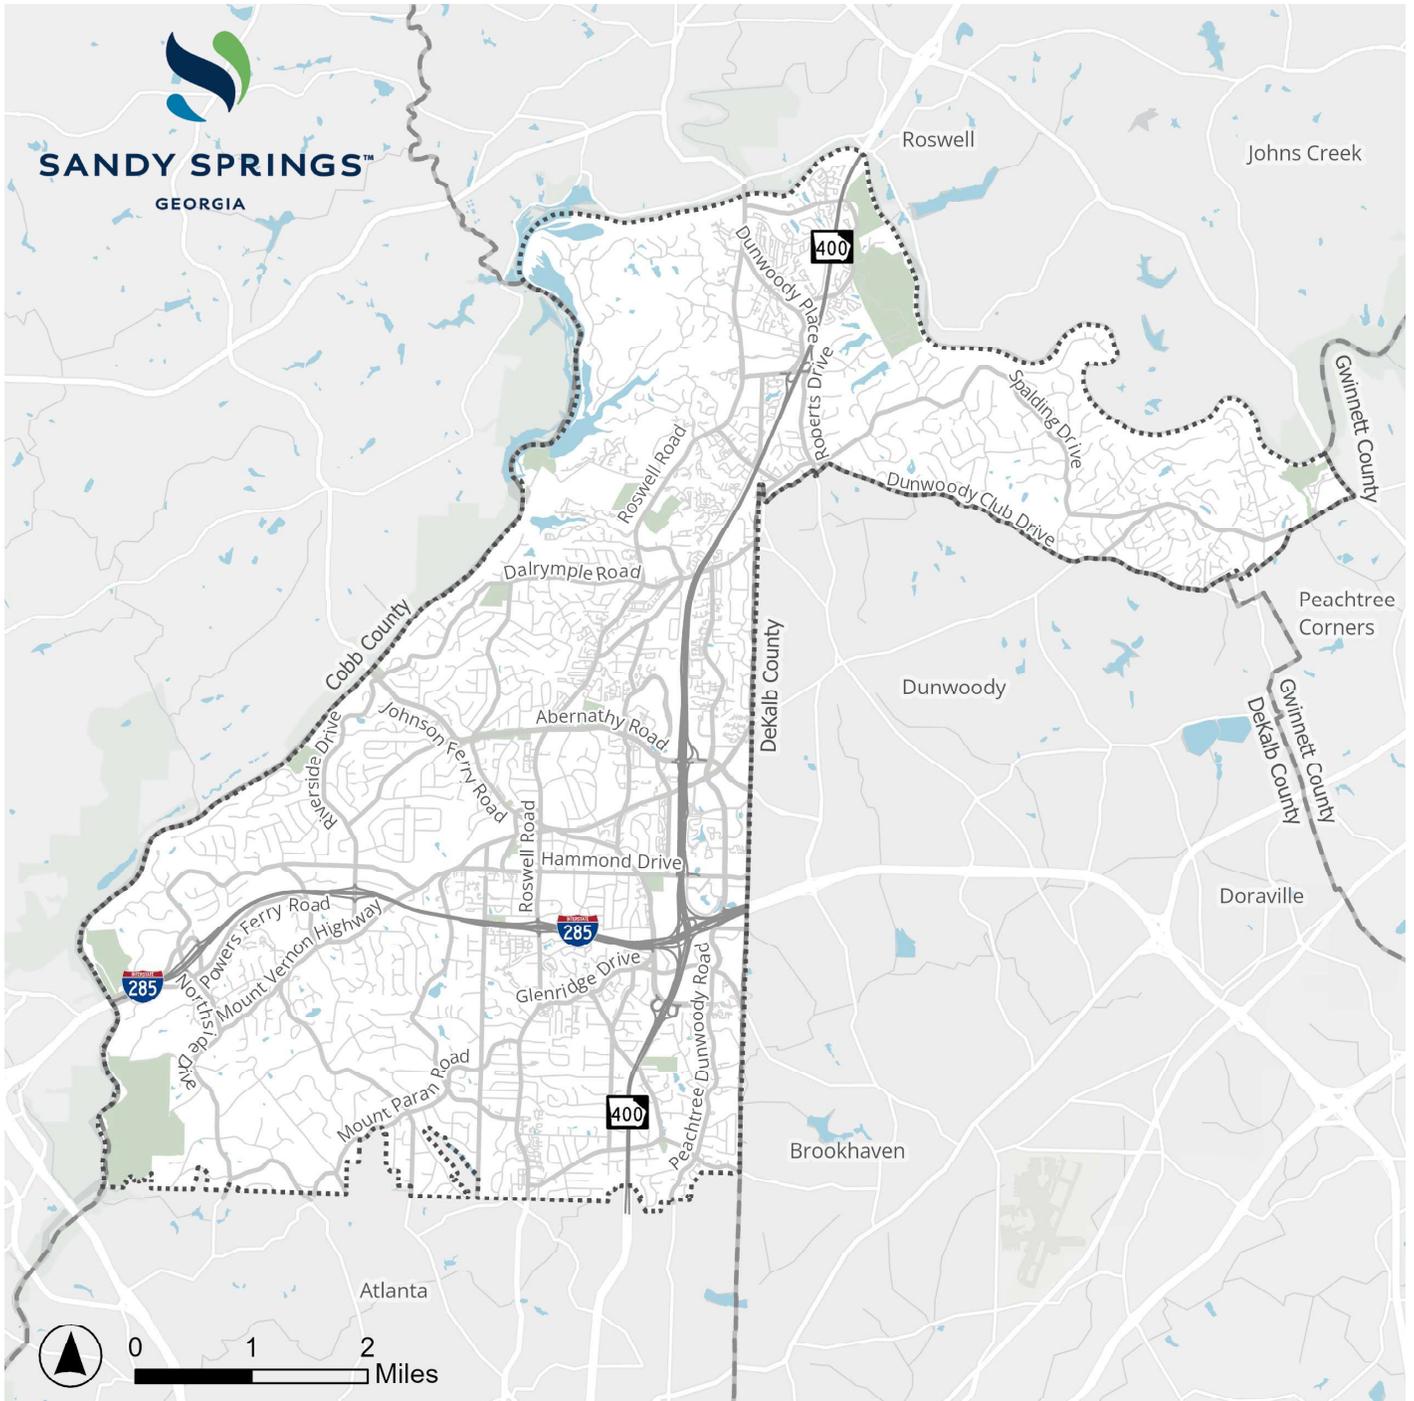

Some project types are evaluated using additional or special metrics. These project types are indicated with an asterisk (*).

Curious about sidewalk projects in your neighborhood? Check out the sidewalk projects board!

# Did we miss any important transportation projects?
## Leave a note on the map below about other projects you think should be prioritized in the TMP
